

# Pamela's Pro Tips & Techniques

**IT'S IMPORTANT TO NOTE THAT NO TWO CURLY HEADS ARE THE SAME.**

To have a lot of volume, you have to be okay with a good amount of **FRIZZ**.

**NANOWORKS GOLD SHAMPOO/CONDITIONER** excellent for reviving dry hair and renewing both manageability and softness. A must for curly hair!

**COLOR FANATIC MULTI-TASKING LEAVE-IN SPRAY WITH 21 BENEFITS** helps with curl definition, shine and reviving day 2 style!

**SHINE BRIGHT TAMING SERUM** great for breaking the cast and separating curls.

**DRY CUTTING TECHNIQUE** when cutting and shaping the hair, I recommend cutting the hair on day 2 of washed and styled hair. You can see the frizz ratio to how every curl falls on the head and shape it accordingly. Curls should be cut like a diamond.

**CURLY HAIR AFTERCARE** the aftercare of your styling routine is just as important as how you style it! Sleeping with your hair in a "pineapple" (high top ponytail in a loose silk scrunchie), and/or sleeping with your hair in a silk bonnet are two of my go-to protective styles.
